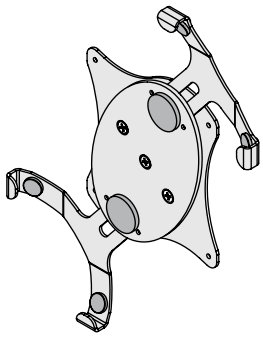
iPad™ IPM-200 Mounting Frame Installation Instructions



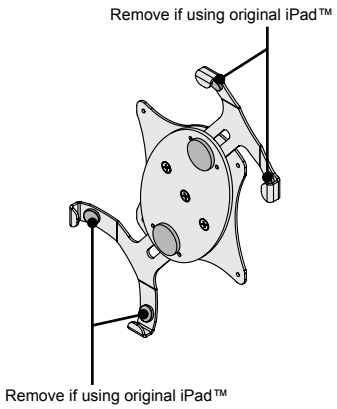
The IPM-200 open mounting frame securely holds the Apple iPad™ or iPad2™ (not included) in place and gives access to all iPad™ controls and connections. It fastens easily to any of Premier Mounts' wall or table mounts (sold separately) using the VESA 100x100mm mounting pattern, allowing tilt, rotation, height and/or directional adjustments. Lock-It™ security hardware is included.

Step 1

Are you installing an original iPad™ or iPad2™ to the IPM-200?

If an **original iPad™,** remove the corner felt pads on the IPM-200. Then continue to step 2 below.

If an **iPad2™,** continue to step 2 below.



Step 2

1. Extend the arms of the IPM-200.
2. Insert the iPad™ in the IPM-200.

Each arm of the IPM-200 should fit over a corner of the iPad™.

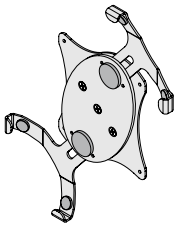
Parts List



IPM-200
(Qty 1)

M4 x 8mm Security Screw
(Qty 4)

M5 Security Allen Wrench
(Qty 1)

Step 3

1. Adjust the arms on the IPM-200 so that the iPad™ fits snuggly inside the mount (Figure 1).
2. Tighten the two (2) pre-installed Phillips screws on the back of the IPM-200 to secure the arms (Figure 2).

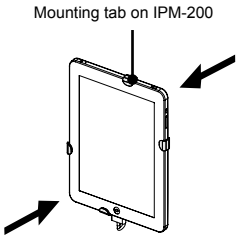


Figure 1

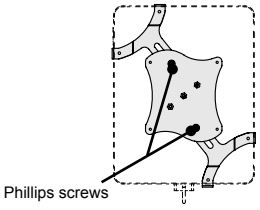

Figure 2

Step 4

AM50S-B mount shown for illustration purposes only.

Use the M5 security Allen wrench and four (4) M4 x 8mm security screws to attach the IPM-200 to any 100x100mm VESA mount.

Follow the installation instructions included with the VESA mount.
